PROFILE

Software engineer with a CS background and a strong interest in building systems leveraging AI and LLM technologies. Built and shipped a modular AI agent platform with persistent memory, automated pipelines, sandboxed execution, and real-time integration — end to end, independently. Comfortable across the full SD stack but most at home on the AI layer.

WORK EXPERIENCE

Fujitsu System Global Solutions Management

Software Developer — Oct 2021 – Jan 2024

- Contributed to full-stack development, focusing on front-end frameworks and PostgreSQL troubleshooting for scalable, efficient systems
- Improved application performance through optimization of front-end code and database queries
- Collaborated in a 17-person team, developing .NET web applications tailored to meet evolving business requirements
- Modernized legacy web applications, migrating from IE to Chromium-based browsers improving compatibility and performance

FEATURED PROJECTS

Clawcer Machine — AI Agent Assistant

Developed a modular personal AI assistant platform with persistent memory, secure execution controls, and semi-automated workflows, integrated with Telegram for real-time interaction and task automation.

- Engineered a privacy-focused web search and structured local storage system with RAG-like retrieval capabilities, enabling real-time data access and contextual continuity across sessions
- Built an end-to-end automated resume generation pipeline — job parsing, relevance scoring, PDF generation, and delivery — reducing manual tailoring time by 90%
- Developed a secure execution layer with command allowlisting, user approval prompts, and sandboxed wrapper scripts to mitigate unsafe operations, enforcing clear execution boundaries
- Optimized system performance for low-resource environments through efficient process management, containerization, and volume-based data persistence
- Established a scalable architecture for adding new AI skills and integrations, designed for ease of expansion

EDUCATION

Tunku Abdul Rahman University College

Bachelor's Degree in Computer Science (Honours) — May 2021

- Honours Degree with Distinction (CGPA: 3.79)
- President's List (2 semesters), Dean's List (4 semesters)

CERTIFICATIONS & SKILLS

Technical Skills: Generative AI (GPT, LLMs), AI Agents, Python, React, Node.js, RAG, Prompt Engineering, JavaScript, TypeScript

Certifications: AZ-900: Microsoft Azure Fundamentals | Microsoft, Jun 2022

Languages: English, Chinese, Malay
