PROFILE

AI-focused software engineer who turns business requirements into production systems, combining LLMs and agentic workflows with full-stack engineering and deterministic logic. Experienced in building AI-powered automation, from LLM–driven reporting to multilingual semantic matching, and in shipping products from spec to deployment.

WORK EXPERIENCE

Thousands Of Years Media

AI Native Software Developer — 2026 – Present

- Built an AI-powered employee reporting system, reducing estimated management review time from 2 hours to 10 minutes.
- Integrated Gemini and Google Workspace into the reporting system for automated task extraction, target matching and progress summaries.
- Engineered multilingual semantic duplicate detection, achieving approximately 90% benchmark accuracy and reducing investigation time from 30 to 3 minutes daily.
- Optimized the detection pipeline through custom tokenization and embedding inference in PHP, reducing model size by 87% without external AI APIs.

Independent Learning & Product Development — 2024 – 2026

- Independently designed, built, and shipped multiple full-stack web products from concept to production
- Developed AI-integrated applications leveraging LLM APIs
- Explored agentic AI workflows and modern AI frameworks through hands-on experimentation and product development

Fujitsu System Global Solutions Management

Software Developer — 2021 – 2024

- Contributed to full-stack development of .NET web applications in a 17-person team aligned with business requirements
- Migrated legacy web applications from IE to Chromium-based browsers improving compatibility and performance
- Optimized application performance through front-end code improvements and PostgreSQL query tuning

EDUCATION

Tunku Abdul Rahman University College

Bachelor's Degree in Computer Science (Honours) — May 2021

- Honours Degree with Distinction (CGPA: 3.79)
- President's List (2 semesters), Dean's List (4 semesters)

CERTIFICATIONS & SKILLS

Technical Skills: Python, React, Next.js, OpenAI API, AI Agents, AI-Assisted Development, Linux, Docker, JavaScript, TypeScript, PostgreSQL, Claude Code, MCP, Semantic Search

Certifications: AZ-900: Microsoft Azure Fundamentals | Microsoft, Jun 2022, • Agentic AI Certified Foundations Associate | Oracle, Aug 2026

Languages: English, Chinese, Malay
